

- **Lab Name:** Metal\_Studio

- **Description of Lab:** The metal studio is a vibrant and bustling space where creativity and craftsmanship come together to bring raw materials to life. Located in the heart of the industrial design , this studio is a hub of activity for artists, designers, and metalworkers alike.

Upon entering the studio, you're immediately struck by the sound of metal being worked and the smell of oil and grease. The space is filled with industrial equipment and tools, from welding machines to lathes to hydraulic presses. Workstations are spread throughout the space, each one customized to meet the needs of the artist or metalworker who calls it home.

The studio is bathed in natural light, which pours in through large windows that overlook the city. The walls are adorned with works of art, from sculptures to metal wall hangings, that showcase the talent and creativity of those who work here.

- **Available Resources/Software/Hardware:**

- Lathe machines
- CNC Lathe Machine (HMC)
- CNC milling machine (VMC)
- Milling machines
- Hydraulic Press Machines
- Welding Machines
- Metal Working Tools
