

- **Lab Name:** Software Lab

- **Description of Lab:**

The software lab is a cutting-edge space where students in the Bachelor of Design program come to explore the world of digital design and development. Located at the heart of the campus, this lab is a hub of creativity and innovation, designed to inspire and empower the next generation of design leaders.

Upon entering the lab, you're immediately struck by the sleek, modern design of the space. The walls are adorned with large, high-resolution screens that display stunning visualizations and interactive design prototypes. Workstations are equipped with top-of-the-line hardware and software, including industry-standard design and development tools such as Adobe Creative Suite, Sketch, and Figma.

The lab is staffed by experienced designers and developers who are on hand to provide guidance and support to students as they work on projects ranging from web design to app development to 3D modeling. The lab also offers access to a wide range of resources, including online tutorials, books, and other reference materials, to help students build their skills and stay up-to-date with the latest trends and technologies in the field.

With a focus on hands-on learning and collaboration, the software lab is a place where students can experiment, explore, and push the boundaries of what's possible in the world of digital design. Whether you're a seasoned designer or just starting out, the software lab is the perfect place to develop your skills and take your designs to the next level.

- **Available Resources/Software/Hardware:**

- Drawing tables
- Seating arrangement
- Drawing Instruments
- 3D models of geometry elements.
- Drawing Boards

- **Any Other:**

- **Attach separate Photo of laboratory**
